

A Quick Survey

Shape the Future of Research Assessment in Switzerland

Are you working in academia and have thoughts or questions about research assessment and incentives?

Participate in the Swiss Reproducibility Network (SwissRN) Dialogue Series!

Contributing your questions and wishes on research assessment in Switzerland by taking part in a short survey.

Your input will help us facilitate a dialogue between you – the Swiss research community – and key science policy stakeholders. Together we can bridge the gap between high-level policy and the everyday realities of researchers, students, trainers, research managers and supervisors.
